

Get Your Feet Wet for Science:
Wetland and Riparian Science for the Elementary Teacher

Continuing Education credit available through Portland State University

CI 810

Discover ecological wonders in your back yard. Investigate common wetland processes and learn to identify local riparian plants and animals. Examine necessary components of riparian habitats and how they are represented in the urban environment. Activities address utilizing local schoolyards and natural areas to establish scientific inquiry projects for your students. Participants will gain hands-on experience and curriculum they can bring back to their classroom. This workshop is for educators working with grades 2-8 with a focus on grades 3-5. This course is offered in coordination with Project Learning Tree and Project WET.

First meeting: Classroom and Field Activities: August 4, 2011; 9:30-4:30

Second Meeting: Educational Canoe Trip: August 5, 2011; 10:00-2:00

Offered at: Whitaker Ponds Nature Park, 7040 NE 47th Avenue, Portland, OR 97218

To Register:

Visit the Oregon Natural Resource Education Program (Project Learning Tree, Project WET, and Project WILD provider) website at: <http://www.cof.orst.edu/cof/extended/onrep/>
And click on "Upcoming Workshops" on the right hand side.
